- Easy to understand – competent – innovative – up-to-date – forward-looking – economical

Services: Business Concept:

Caladia Solar Group is made up of 650 partner companies throughout Europe, Canada, China and South Africa, with some 3900 employees, 30 years experience in heating energy and 15 years renewable energy and the photovoltaic sector.

Subject of cooperation is production, sales and installation of the Caladia storage heating, the photovoltaic system, the LED lighting kit, the sales of solar modules, inverters and installation system as well as planning and design and implementation of small and medium-sized PV systems all the way to solar power plants in the megawatt range.

Placement of objects and building plots for realisation of a business for investors and investor groups. Main focus is in real estate and PV systems with alternative energy and energy conservation. Caladia Solar Group helps in the development and implementation of the low energy range objects and takes over the project management for the various construction projects from beginning to end in collaboration with the respective local partners.

Caladia Solar Group has many years of know how as well as connections and due to its extensive experience is able to use these to synergistic advantage.

Caladia Solar Group's main purpose is to make sure that the requirements of a project as well as the planning and execution phase are reached.

For construction projects in the commercial and PV sector Caladia Solar Group uses the expertise as entrepreneurs of different projects and partners. We offer flexible and customized cooperation especially when a project needs to be implemented fast and successfully.

The partnership with leading, highly specialized companies, who can manage the linguistic and bureaucratic hurdles of the different countries, ensures highest quality standard and guarantee.
